Omkar Najan

Backend Software Engineer · Java · Spring Boot · AWS

Hyderabad, India · omkarnajan.cs@gmail.com · omkarnajan.github.io · linkedin.com/in/Omkar-Najan · github.com/omkarnajan · leetcode.com/u/COderOmi

SUMMARY

Backend engineer with ~3 years building secure, resilient Java and Spring Boot services on AWS. At Amazon, owned a zero-downtime migration of a 1.2K+ events/min order pipeline to AWS Lambda and built a multi-channel customer notification service used across 5 travel businesses. Strong in system design, testing, CI/CD, on-call operations and practical AI agent tooling.

SKILLS

Languages	Java 21, Python, SQL, C++, JavaScript
Backend	Spring Boot, REST APIs, microservices, event-driven architecture
AWS	Lambda, ECS, SQS (FIFO), SNS, DynamoDB, API Gateway, S3, CloudWatch, KMS, IAM, CDK
Data & DevOps	DynamoDB, MySQL, Redis · Docker, CI/CD, Git · unit/integration testing, observability
Reliability	DLQs, retries, idempotency, least-privilege IAM, KMS encryption, SigV4
AI	LLM integrations, agentic workflows, prompt engineering, MCP

EXPERIENCE

Software Engineer — Amazon Jul 2025 – Jul 2026
Hyderabad, India

- Owned design and delivery of migrating an order-event service (**1.2K+ events/min**) from EC2 (Java 8) to **AWS Lambda (Java 21, SnapStart)**; authored HLD/LLD and shipped via CDK pipelines with **95% unit-test coverage**.
- Built an ordered, fault-tolerant pipeline on SQS FIFO, SNS and DynamoDB: per-order ordering, per-vertical routing, DLQs, de-duplication, retries, partial-batch failure handling and an atomic-counter audit log.
- Executed a **zero-downtime cross-region cutover** with gated traffic shifting (1% → 100%), DynamoDB Global Tables and a **sub-10-minute rollback** path.
- Architected a multi-channel User Communication Service (Spring Boot on ECS) for Email, SMS, WhatsApp and PDF e-tickets across **5 travel domains**; Factory/Strategy design, 14+ templates, KMS-encrypted PII, idempotent sends.
- Built an **AI on-call incident-triage agent** automating read-only investigation across logs, metrics, alarms and tickets, with defense-in-depth safety (tool allowlist, command-deny hooks, SELECT-only DB access).
- Built reusable SNS CDK constructs and led shared CDK library upgrades adopted by 2 teams; resolved multiple Sev2 incidents on the on-call rotation.

Software Engineer — Cytel Inc. Aug 2023 – Jun 2025
Pune, India

- Replaced a legacy XML layer with a JSON interface linking a C++ simulation engine to a Java/Spring Boot backend, enabling the move from desktop to web.
- Developed Java REST APIs orchestrating **15+ clinical simulations** on the C++ core with reliable cross-platform serialization.
- Automated CI/CD with Bitbucket, Python and Docker, **cutting testing time by 60%**; reviewed code and mentored an intern.

DC Analyst — Deloitte USI Jan 2023 – Aug 2023
Hyderabad, India

- Built and ran SQL workflows to process and validate payroll data for **50,000+ employees**.

EDUCATION

B.Tech., Computer Science and Engineering — MIT World Peace University 2018 – 2022
CGPA 9.3/10 · Solved 500+ data structures and algorithms problems on LeetCode and similar platforms.

CERTIFICATIONS

IBM Data Science Specialization (IBM, 2021) · **Full-Stack Web Development with React** (HKUST, 2020) · **Algorithms on Graphs** and **Algorithmic Toolbox** (UC San Diego, 2021)
